With the enrapturing sensation of the advanced ColorBath™ Chromolights System, mixing mood with aromatherapy and sound, **HydraOcean IR™** allows you to offer an invigorating and blissful collection of skin, face and body care services while enhancing the best traditional spa services.

Hydrofusion™

Hydrofusion is an extraordinary engineering breakthrough creating a single blended energy force through the harmonization of far infrared heat and steam, allows you to use both of these natural energies individually or simultaneously. Increased body temperatures cause the skin to perspire to keep the core temperature stable, cleansing and hydrating. It also promotes a healthy weight and encourages healthy nutrition and hydration. Together, these elements join forces to optimize body cleansing, moisturization, and can improve physical fitness. Plus improve relaxation, sleep management, including managing stress and these are just a few powerful benefits.

■ **Infrared:** The infrared emitters are engineered to produce comfortable heat within the far infrared category.

■ **Steam:** Moist heat is gentler on the body than the dry heat of a sauna because it softens the skin as it opens pores and stimulates perspiration. Herbs or essential oils infused into steam will enhance the results. **HydraOcean IR™** features adjustable temperature steam for body and skin therapy (up to 48°C/118°F).

■ **Mist:** A light mist is instantly dispersed over the body via the touch of a button; if desired, you can add minerals and vitamins to the mist creating an added treatment and nutrient similar to all natural hot springs therapies services.

■ **Vitamin/Mineral System:** Dispenses nutrients such as vitamins and minerals into the mist stream allowing skin to transdermally drink up the nourishment of vitamins and minerals. The mist system can have the same powerful benefits as a mineral springs bath.

■ **Aromatherapy:** Two unique aroma reservoirs that vaporize essential oils and herbal extracts to awaken olfactory senses and to enhance results and enjoyment. Pure essential oils and herbal essences stimulate the body through the sense of smell and through their ability to permeate the skin. Aromatherapy essential oils and herbal extracts may be combined to achieve customized results.

■ **Chromolights:** State-of-the-art digital lighting technology chromolights light stations to generate a variety of rich and atmospheric colored lights. Emanating from the translucent pebble-grain shell, the mood enhancing chromotherapy glow will put your client in a total state of harmony and balance. By combining color services with other spa services, their effects are dramatic. Each one of the **HydraOcean IR's** pre-set programs features a different Colorbath™ with random color changes and multicolor cross fades made up of all the colors of the spectrum, from soothing and relaxing, to balancing and energizing.

■ **Vichy Shower System:** Also, state-of-the-art dual Vichy shower body spray system features 10 above the body showers with adjustable spray direction for a relaxing total-body massage. Three pre-set Vichy shower programs are available as well as a Scottish Shower mode, alternating hot and cold jets.

■ **Vibratory Massage Bed:** Engage all of the body's systems to work in unison toward the goal of systemic harmony. Cradling the body, the ergonomically-designed support bed features a patented massage vibration system featuring continuous and pulsating vibration to stimulate the body's physiological systems.

■ **Hand Shower:** An indispensable feature to rinse products from your client's body wrap experience and for cleaning the interior of the unit after each session.

■ **Foot Spray:** Soothe, revive and refresh aching feet with two foot massager jets that spray water gently over the feet for a special spa experience.
